Introducing the new bed base linking innovation,
EasyLink™ specifically for the hospitality sector.

Following consultation, Hypnos has developed its latest innovation in response to the increasing demand from housekeepers for Zip and Link beds that are easier and safer to use, and quicker to transform room function.

HYPNOS®

THE MOST COMFORTABLE BEDS IN THE WORLD

EasyLink™

B E D B A S E
L I N K I N G B A R S

With EasyLink™, linking bars are placed on top of the bed base instead of the bottom, meaning housekeepers no longer have to lift the bed to access the linking bar underneath the bed base, or have an unsightly linking bar on the front. Housekeepers will be able to operate the new linking bar by standing up, rather than kneeling to operate external and under linked options, making the job more comfortable and safe to do.

“As a trusted supplier to some of the largest independent hotels, groups, spas and resorts in the world, Hypnos holds a reputation for innovating products that meet the requirements of our customers in this sector. Our latest innovation, EasyLink™, offers a discreet solution of linking that doesn’t take away from the aesthetics of a bed base, and has been developed specifically with housekeepers in mind. What’s more, we’re delighted to offer this new product as our standard linking option, available to hoteliers at no additional cost.”
