HYPNOS®

THE MOST COMFORTABLE BEDS IN THE WORLD

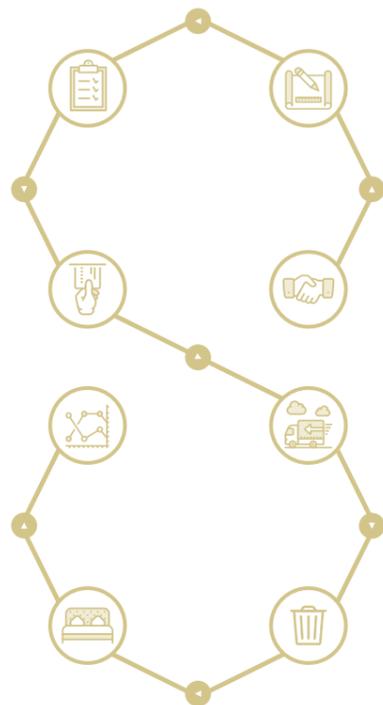

Disposal & Recycling Service

A hassle-free service solution

Our 8 Step Sleep Plan is a full service project management solution that includes a recycling and disposal service for old bedroom furniture that guarantees 100% landfill avoidance.

The average mattress has a volume of 23 cubic feet. With 7.5 million mattresses discarded in the UK alone each year, the resulting landfill space that is consumed is enough to fill Wembley Stadium 5 times over!

Determined to have a positive effect on this wasteful inefficiency, Hypnos was the first bed maker in the world to become carbon neutral and are the only company in the world to hold this status for over 8 years, an accolade of which we are very proud.

8 Step Sleep Plan

- 1 Initial consultation and project planning
- 2 Detailed design and specification
- 3 Bespoke sleep options
- 4 Financing
- 5 Delivery and installation
- 6 Old bed disposal and recycling
- 7 Sleep accessories
- 8 Whole-life monitoring and marketing

Zero landfill. Zero carbon footprint.

Our Approach

Hypnos has created a new and innovative approach to furniture disposal, recycling and waste management, all in the name of maintaining our status as the world's first carbon neutral bed manufacturer.

We work with industry leading waste specialists, The Furniture Recycling Company, to achieve the following...

No. 1

Recycle mattresses, bed bases, sofa beds and a wide range of wooden bedroom furniture

No. 2

Prevent products going to landfill, where mattresses can take over 15 years to decompose

No. 3

Re-use products at the highest point of the circular economy, in their original format, or alternatively donate them to charities across the UK and abroad

No. 4

Shred and separate products into individual waste streams for use in other industries*

No. 5

Minimise our carbon footprint through efficient use of backhauling after delivery of new products

No. 6

Our old bed disposal and recycling service helps our clients to reduce their carbon footprint, complimenting their waste management strategy

*Mattress springs are valuable steel that are melted and made into a number of products. Foam is processed into carpet underlay, wood is used to make mulch and fibre is reprocessed and used to create car filters.

**Committed to global sustainability:
“Zero Landfill & Zero Carbon Footprint”**
